

# NovaMind Technologies

## Company Information Guide

### About Us

NovaMind Technologies is an AI-first software company founded in 2018 and headquartered in Austin, Texas. We build intelligent automation tools that help businesses streamline operations, reduce manual work, and unlock insights from their data. With a team of over 200 engineers, designers, and researchers, NovaMind serves clients across healthcare, finance, logistics, and e-commerce sectors.

### Our Mission

Our mission is to make artificial intelligence accessible and practical for every business, regardless of size or technical expertise. We believe AI should be a tool that empowers people, not replaces them.

### Our Products

**NovaFlow:** An intelligent workflow automation platform that connects your existing tools and automates repetitive tasks using AI. It integrates with over 500 apps including Salesforce, Slack, and Google Workspace.

**NovaMind Insights:** A business intelligence platform powered by large language models. Users can ask questions in plain English and get data visualizations, summaries, and forecasts instantly.

**NovaHire:** An AI-powered recruitment assistant that helps HR teams screen resumes, schedule interviews, and evaluate candidates consistently and fairly.

### Culture and Values

At NovaMind, we live by four core values: Curiosity, Integrity, Collaboration, and Impact. We encourage every team member to experiment, share ideas openly, and challenge the status quo. We host weekly learning sessions, quarterly hackathons, and maintain a flat

organizational structure where every voice matters.

## **Engineering Culture**

Our engineering team follows agile practices with two-week sprints. We use Python, TypeScript, and Go as our primary languages. Our infrastructure runs on AWS with Kubernetes for orchestration. Engineers have 10% time each week to explore personal projects or contribute to open source.

## **Benefits and Perks**

NovaMind offers competitive salaries benchmarked at the 75th percentile of the market. Benefits include full medical, dental, and vision coverage, a \$2,000 annual learning budget, flexible remote work options, unlimited PTO, stock options for all full-time employees, and a home office stipend of \$1,500.

## **Revenue and Growth**

NovaMind reached \$45 million in annual recurring revenue in 2024, representing 80% year-over-year growth. We have raised \$120 million in total funding across Series A, B, and C rounds, with our most recent Series C led by Sequoia Capital in 2023.

## **Interview Process**

Our hiring process consists of four stages: an initial recruiter screen (30 minutes), a hiring manager conversation (45 minutes), a technical assessment (60-90 minutes), and a final panel interview with the team (60 minutes). We aim to complete the entire process within three weeks.
